## REPORT

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICULTURE  
AND TECHNICAL INSTRUCTION FOR IRELAND.

---

SIR,

We have the honour to submit Part I. of the Report for the year 1904 on the Sea and Inland Fisheries of Ireland.

### **PART I.—GENERAL REPORT.**

#### GENERAL OBSERVATIONS.

The quantity of sea fish landed on the Irish Coast in 1904 was greater than that in any other year for which records exist. Prices were not so good as in 1903, and the general result of the year's working totalled £393,630, which was about £34,000 less than in 1903.

It is unfortunate for the fishermen that, with a capture which for the last five years, with one exception, has been steadily increasing, prices, except in the case of prime classes of fish, should not maintain the high level of former years. It is not the increased catch on the Irish coast that has affected the markets, because improved facilities for distribution have extended the area of demand in England, and in consequence the markets of that country absorb a supply so great as to be little affected by fluctuations in the Irish catch. The real cause is a general cheapening of fish by the enormous quantities brought by fishing steamers from Iceland, Faroe, the Bay of Biscay, the North Sea, and even from the West of Ireland, and landed in English ports. This supply has been increasing, and the abnormal demand which formerly, in Ireland, at the opening of a season's fishing, drove prices up to a high level for the first lots of fish despatched, has disappeared, owing to the steady flow of fresh fish into all the great markets.

Dublin, which is practically the only distributing market in Ireland, dealt with 277 tons more fish in the year under review than in 1903.

The home markets are not, however, all we have to look to. Our cured herrings go to Germany, Russia and America, and the latter country also takes the cured mackerel.

In Germany and America the Donegal herrings have fetched higher prices than any others sent to those markets.

America is fairly constant as to price for good cured mackerel. Careless and bad curing in one part of Ireland tends to injure the demand for all Irish mackerel. The quality and reputation, of the cure, is therefore, all important. Next to this the most important factor in the question of the value to Ireland of her cured mackerel is the yearly variation in the amount of the American yield. Arising out of these elements, the demand for Irish mackerel was not good this year; and, though the amount sent to America was greater than in any year since 1896, the money paid to the fishermen for the autumn mackerel capture was £18,639 less than in 1903.

Details of the Spring Mackerel and Summer Herring Fisheries of this year (see pp. xiii and xvii) were published in the Department's Journal for October last.

The total capture of salmon and peal in 1904 was somewhat less than in the previous year, while the implements of capture, both nets and rods, show an increase in number. The output from the hatcheries also increased by 682,580 fry.

The use of a greater number of engines points to an expansion in the value of salmon to the country, and to the immense importance of preserving the spawning streams in which such great waste of fish life occurs. The Department have testified to their interest in this matter by giving financial assistance to Boards of Conservators in cases where the ordinary revenue appeared wholly inadequate to the task these Boards had to perform.

The construction of piers and improvement of harbours, with the object of aiding the fishing industry, have led to great pressure of work on the whole staff of this branch, and especially on the Engineering Section.

Notwithstanding the increase in the amount of sea fish captured the statistics show a slight falling off in the number of boats engaged, and a decline in the number of persons by 305 men and 65 boys.

The fluctuations in the *personnel* of the fisheries depend on many causes, but undoubtedly in 1904 the emigration to America which took place from the coast districts was abnormal, and is reported from various centres. This was brought about by the low passenger rates prevailing. With regard to boats, while many out of date were broken up, a great many were built, some of these latter being either "Zulus" for the herring fishery, "Nobbies" for the mackerel, or sailing yawls for the sea salmon drift net fishing, which has developed rapidly in the last few years.

The system of telegraphic intelligence, which proved successful in connection with the spring mackerel fishery, was, in 1903, extended to the summer and winter herring fisheries, and worked satisfactorily during 1904. Intelligence was distributed throughout the whole year to all the herring centres of importance; the amount of fish caught, average prices, number of boats engaged, quality of the fish, and other items of interest being reported twice weekly.

An application for a by-law, which would have the effect of preventing the capture of herrings within three miles of the coast of the counties of Waterford and Wexford during the months of March, April, and May in each year, was publicly inquired into at Dummore East and Dungurvan, on the 31st May, 1904, and the following day. The evidence, however, did not appear to justify any by-law restricting herring-fishing in the locality in question.

For some years past there have been certain restrictions on the method of fishing known as trawling in Donegal and Inver Bays. We received an application to make further restrictions in the former locality. We held public inquiries into this application at Dunkineely, Killybegs, Donegal, and Bundoran in September last. The evidence taken thereat did not, however, seem to justify any change in the existing regulations.

The by-law of the 20th January, 1903, which virtually made a close season during the month of April in each year for herrings between the Bloody Foreland and Malin Head, County Donegal, was found to be efficacious; and we held a further inquiry in October, 1904, with a view to extending the sphere of its operation. As a result, we made a practically similar by-law on the 6th March, 1905, affecting, however, an area between Ramore Head in the County of Antrim, and Malinmore in the County of Donegal. This by-law was approved, and is now in force.

Four applications for licences to plant oyster or periwinkle beds were inquired into during the year; one of which was granted, and the others are under consideration.

The enforcement of the by-laws on the coast has, as usual, been carried on by the Department's steam cruiser "Helga" and the S.S. "Granuaile" (owned by the Congested Districts Board). Particulars as to detected offences against the by-laws will be found under the head of Marine Superintendence on page xxv. These offences have undoubtedly become much fewer than formerly.

Great assistance in the enforcement of the salmon fishery laws, in the collection of statistics, and in the investigation of numerous matters of detail arising out of our administration of the loan fund, was rendered by the Inspector-General, Officers, and men of the Royal Irish Constabulary, and also by the Officers, Warrant Officers, and men of the Coast Guard. The Fishmongers' Company of London have continued the important assistance hitherto rendered, and which has had a marked effect in the suppression of salmon poaching in Ireland.

## THE SEA FISHERIES.

*Vessels, Men, and Boys.*

There were 6,221 vessels actually engaged in the sea fisheries in 1904, as compared with 6,235 in 1903, showing a decrease of 14.

This year's figures are composed of 379 first, 2,998 second, 2,596 third class boats, 140 unclassified open row boats and canoes of 18 feet and upwards in length, and 186 unclassified open row boats of under 18 feet. The net falling off above-mentioned results from an increase of 3 in the first class, 59 in second, 118 in unclassified open row boats, and a decrease of 194 in the third class.

There were 23,901 men and 462 boys employed, being 305 men and 65 boys less than in the previous year.

Beam trawling was carried on by 1 steam and 168 sailing boats. Otter trawling was carried on by 9 steam and 255 sailing boats. Of the steamers, three were over 60 tons, two were 48 tons, one was 46 tons, one was 21 tons, one was 20 tons, and two were 10 tons, net register. Of the sailing trawlers 277 were under 10 tons, 70 between 10 and 20 tons, 40 between 20 and 30 tons, 16 between 30 and 40 tons, 16 between 40 and 50 tons, and 4 over 50 tons.

There were about 1,500 men and 30 boys engaged in trawling.

Fishing by long lines was carried on by about 5,700 men and 28 boys, in 46 first class, 712 second class, and 582 third class boats.

Nearly 700 persons were engaged gathering oysters off the public beds.

About 3,500 persons were engaged at the lobster and crab fisheries.

About 250 persons were engaged picking mussels, 250 picking cockles, and 4,000 in gathering periwinkles.

Further details are given in the Appendices.

The number of boats engaged in the mackerel fisheries are referred to on pages xv. and xvi., and in the herring fisheries in Appendices Nos. 5 and 6.

There were 30 first, 511 second, 376 third class, and 9 unclassified, boats that did not fish during the year.

One first class boat from Portavogie attended the Scotch herring fishery.

*Review of Statistics of Fish (excluding Salmon) Landed.*

According to the returns received, the total quantity of sea fish (other than shell fish) captured in 1904 was 951,836 cwts., valued at £344,154. In 1903 the corresponding figures were 838,412 cwts. and £376,049. The former, therefore, show an increase in capture of 113,424 cwts., but a decrease of £31,895 in money.

The following figures will show at a glance a comparison of the takes on the different coasts during the two years:—

—		Cwts.	Value.
			£
North Coast,	1904,	138,315	44,750
„	1903,	69,541	33,803
East Coast,	1904,	172,663	98,406
„	1903,	205,181	104,353
South Coast,	1904,	322,787	89,791
„	1903,	274,348	113,593
West Coast,	1904,	318,071	111,207
„	1903,	289,342	124,300

The average price per cwt. of the total catch in 1904 was about 7s. 2½d., as compared with 8s. 11½d., in the previous year.

Including shell-fish, the total value for 1904 was £393,630, and for 1903, £427,800.

The following is a comparison between this year and 1903 in respect to quantities, values, and average prices of the different kinds of sea fish landed in Ireland:—

*Brill*.—The total capture of brill in 1904 was 474 cwts., valued at £1,304, as compared with 637 cwts., valued at £1,430 in 1903.

The average price per cwt. in 1904, was about £2 15s. 0¼d., and in 1903, about £2 4s. 10¾d.

*Soles*.—The total capture of soles in 1904 was 3,008 cwts., valued at £12,922, as compared with 3,636 cwts., valued at £14,088, in 1903.

The average price in 1904 was £4 5s. 11d. per cwt., and in 1903 almost £3 17s. 6d. per cwt.

*Turbot*.—The total capture of turbot in 1904 was 639 cwts., valued at £3,012, as compared with 843 cwts., valued at £3,961, in 1903.

The average price in 1904 was £4 14s. 3¼d. per cwt., and in 1903 almost £4 13s. 11¾d. per cwt.

*Cod*.—The total capture of cod in 1904 was 20,492 cwts., valued at £13,602, as compared with 16,741 cwts., valued at £12,454, in 1903.

The average price per cwt. in 1904 was 13s. 3¼d., and in 1903 slightly over 14s. 10½d.

*Conger eel*.—The total capture of conger eel in 1904 was 7,533 cwts., valued at £4,064, as compared with 7,036 cwts., valued at £4,091 in 1903.

The average price per cwt. in 1904 was about 10s. 9½d., and in 1903 about 11s. 7½d.

*Haddock.*—The total capture of haddock in 1904 was 15,803 cwts., valued at £11,345, as compared with 8,411 cwts., valued at £7,014 in 1903.

The average price in 1904 was about 14s. 4½d. per cwt., and in 1903 slightly over 16s. 8d.

*Hake.*—The total capture of hake in 1904 was 12,835 cwts., valued at £10,326, as compared with 18,831 cwts., valued at £11,868 in 1903.

The average price per cwt. in 1904 was about 16s. 1d., and in 1903 about 12s. 7½d.

*Herrings.*—The total capture of herrings in 1904 was 286,496 cwts., valued at £93,004.

In the previous year the total capture was 232,980 cwts., and the total value £84,446.

The average price in 1904 was nearly 6s. 6d. per cwt., and in 1903 about 7s. 3d. per cwt.

*Ling.*—The total capture of ling in 1904 was 5,742 cwts., valued at £2,876, as compared with 4,148 cwts., valued at £2,125, in 1903.

The average price per cwt. in 1904 was almost 10s. 0½d., and in 1903 almost 10s. 3d.

*Mackerel.*—The total capture of mackerel in 1904 was 502,501 cwts., valued at £140,278.

In the previous year the total capture was 448,217 cwts., valued at £183,865.

The average price per cwt. in 1904, was nearly 5s. 7d., and in 1903 about 8s. 2½d.

*Plaice.*—The total capture of plaice in 1904 was 20,603 cwts., valued at £19,649, as compared with 19,242 cwts., valued at £19,018 in 1903.

The average price per cwt. was almost 19s. 1d. in 1904, and almost 19s. 9½d. in 1903.

*Ray or Skate.*—The total capture of ray or skate in 1904 was 10,052 cwts., valued at £2,607, as compared with 8,313 cwts., valued at £2,442 in 1903.

The average price per cwt. in 1904 was nearly 5s. 2½d., and in 1903 5s. 10½d.

*Sprats.*—The total capture of sprats in 1904 was 1,635 cwts., valued at £282.

In the previous year the total capture was 8,306 cwts., valued at £1,005.

The average price per cwt. in 1904 was 3s. 5½d., and in 1903 about 2s. 5d.

*Whiting.*—The total capture of whiting in 1904 was 21,280 cwts., valued at £11,347, as compared with 21,259 cwts., valued at £11,367, in 1903.

The average price per cwt. in 1904 was almost 10s. 8d., and in 1903 about 10s. 8½d.

*Other kinds (not including shell fish).—*The total capture in 1904 was 42,743 cwts. valued at £17,536 as compared with 39,812 cwts., valued at £16,875 in 1903.

The average price per cwt. in 1904 was 8s. 2½d. and in 1903 about 8s. 5½d.

### *Shell Fish.*

*Oysters.*—The returns received show that about 15,171 hundreds of oysters were taken off the public beds in 1904, and that the value thereof was £3,313. The figures for the previous year were 25,328 hundreds, and £5,030.

From the private beds, so far as returns are obtainable, about 18,573 hundreds of oysters were lifted. The value of these is estimated at £4,883. The figures for the previous year were 26,875 hundreds, and £5,420.

See also Appendices No. 12, p. 45, and No. 19, p. 80.

*Lobsters.*—The returns received show that about 69,289 dozens of lobsters were captured in 1904, and that their value was £28,644. The figures for the previous year were 72,698 dozens and £29,314.

See also Appendix No. 9, p. 40.

*Crabs.*—The returns received show that about 30,675 dozens of crabs were taken in 1904, and that their value was about £2,535. The figures for the previous year were 27,857 dozens, and £2,364.

See also Appendix No. 10, p. 42.

*Mussels.*—The returns received show that the weight of the mussels taken this year was 804 tons, and that the value thereof was about £1,559. The previous year's figures were about 1,061 tons and £1,581.

See also Appendix No. 13, p. 48.

*Cockles.*—The returns received show that about 49,853 gallons of cockles were picked in 1904, and that their value was about £1,235. The figures for the previous year were 43,661 gallons and £1,251.

See also Appendix No. 14, p. 49.

*Periwinkles.*—The returns received show that the weight of periwinkles taken this year was about 1,761 tons, and that the value thereof was £7,167. The figures for the previous year were 1,630 tons, and £6,520.

See also Appendix No. 15, p. 50.

*Shrimps.*—Shrimping is not largely followed around the Irish coast. The cases mentioned in Appendix No. 11, page 44, are the only ones in which reports came to hand that shrimps had been taken. It is estimated that the value was about £140. The figure for the previous year was £269.

The total value of the shell fish, as furnished in the returns for 1904, is estimated at £49,476 as against £51,751 for 1903.

*Dublin Market Returns.*

During 1904 the quantity of fish passing through the Dublin market, exclusive of herrings, mackerel, and most of the shell-fish, was 77,305 boxes, 7,075 hampers, and 6,982 "cleaves," in all some 5,020 tons of fish. This total shows an increase of 277 tons over the figures of 1903.

The steam trawlers fishing regularly out of Dublin were 9 in number for three months, 10 for one month, and 8 for the rest of the year. They made in all 548 trips, and landed 66,410 boxes of fish, weighing each 1 cwt. Whiting was again the fish landed in largest quantity, viz., 25,482 boxes; the best months for this fish being January, February, March, and September. Cod was landed in the next largest quantity, viz., 8,045 boxes, more than half of which were taken in March.

Hake, haddock, gurnard and pollock amounted to 7,628, 6,523, 2,027, and 1,854 boxes respectively, the hake being principally taken in May, June, July and August.

Of flat fish there were 2,103 boxes of megrims or ox soles, 1,232 of dabs, 452 of plaice, 313 of turbot, 295 of black sole, 160 of brill, and 47 of halibut. The capture of flat fish was fairly evenly distributed during the various seasons of the year.

Two thousand five hundred and ninety-two boxes of ray, 2,246 of conger, 951 of ling, 2,748 of prawns, and a few boxes of various fish completed the total capture, which cannot but be regarded as generally satisfactory.

Besides the Dublin-owned fleet, on twelve occasions other steam trawlers and steam liners landed their fish, amounting to 1,546 boxes, principally hake, whiting, haddock, ray, and conger.

As in 1903, Howth was responsible for the next largest supply to the Dublin market, consisting of 6,982 "cleaves," or 393 tons of fish, a slight increase over the previous year. The fish was as usual nearly all cod and whiting, with small quantities of conger, ray, ling, and haddock. The winter and spring months were the best, many of the boats being engaged in herring fishing during the summer and autumn.

The consignments from the sailing trawlers of Galway consisted of 2,964 hampers, or 296 tons; an increase of 39 tons. 749 boxes of plaice were the principal item, followed in quantity by haddock, whiting, cod, ray, and black soles. February, March, and December—the successful months of this fishing—are largely influenced by weather conditions.

The sailing trawlers and other smaller boats of Dublin Bay accounted for 2,555 hampers, a decrease of 243. The captures were evenly distributed throughout the year, and consisted of 936 boxes of plaice, 781 of ray, 428 of whiting, 426 of haddock, besides smaller quantities of other fish.

The Dingle sailing trawlers contributed 1,556 hampers, or 156 tons, a decrease of 264 hampers. The catch, however, consisted principally of the more valuable kinds of fish, there

being 708 of plaice, 350 of black soles, 160 of ox soles, and lesser quantities of haddock, ray, pollock, and cod. February, March, April, May and June were the best months, particularly March and April, when the plaice and black sole are in Dingle Bay in quantities.

The small fleet of sailing trawlers at Balbriggan were responsible for 1,558 boxes, or 88 tons, an increase of 219 boxes, principally taken in August, September, October, and November, and consisting almost entirely of plaice.

From various other Irish centres 6,907 boxes, or 345 tons, reached the Dublin market consisting of 2,147 of plaice, 1,726 of cod, 1,338 of whiting, and smaller quantities of many other kinds of fish. The consignments arrived in greatest quantities during the winter months, and their total shows the substantial increase of 1,911 boxes. This increase may indicate that the advantages of consigning to a large distributing market are being appreciated.

The imported fish amounted to 884 boxes, as compared with 1,270 last year. It consisted principally of haddock and plaice. It is satisfactory to note this decrease, when it occurs in conjunction with an increase of home-caught fish.

#### *Spring Mackerel Fishery.*

With the exception of the years 1898 and 1899, the Spring mackerel catch of 1904 was well up to the average of the past dozen years. Prices, however, ruled low, and the fishermen's receipts for the fish (about £65,000) fell short by some £25,000 of those for the Spring of 1903. This decline was due in some measure to the depression caused by the threatened increase of the American import duty on Irish pickled mackerel, from which the trade is now happily free. An immediate result of this threatened increase was a reduction in the amount cured for export from 10,400 barrels in 1903 to 3,000 in 1904.

The landings on the south coast, from Kinsale to Baltimore—and also at Valentia—were better this year than last, while at all other important centres they were smaller. At Berehaven, which from its position ought to be, and occasionally has been, the best centre for the Spring fishing on the whole Irish coast, there was a serious falling off. The want of railway transit facilities is felt here. The few large buyers who visit the place come from England, and provide their own steamer transport, and now that the engaged boat system, which concentrated the fleets wherever the buyers wished, has largely gone out of use, the fishermen prefer places where good railway facilities not only lead to the presence of outside buyers, but afford inducement to local firms to engage in the trade, thus improving competition.

The weather was bad at the opening of the season.

It has been the aim of the Department to induce fishermen to move about more, and to visit parts of the coast where better fishing, at any particular season, can be expected than near their

own homes. In charge of a skilled Arklow instructor, an Antrim crew was induced to bring its boat to the Galway coast for the Spring mackerel fishing, but it is to be regretted that this first venture did not meet with the hoped for success.

The information gained from the Fishery Branch's system of telegraphic intelligence includes the following facts :—A few fish were taken during the first three weeks of April, but it was not until the last week of that month that the heavy fishing began, when 320 boats took 27,575 boxes. The best week of the season was that ending on 14th May, when 35,743 boxes were landed by 296 boats, a quantity which exceeded that of any week during the previous year. The heavy fishing ended in June, although a few fish were taken by 47 boats during July.

To take the stations *seriatim* :—

At *Kinsale* the fishing commenced with small quantities in the first week of April, but as happened in 1903, no considerable amount was taken until the end of the month, when the number of boats was 105. During this period the weather was unfavourable. The last three weeks of May were the most successful period, in one of them 9,735 boxes being landed by 74 boats fishing on four nights, an average of 32.9 boxes per boat per night. So plentiful were the fish that the markets were glutted, and fishing stopped for one night in consequence. The average capture per boat per day during the height of the season was considerably higher than that of any period in the previous two years. The season closed at the end of June.

At *Baltimore* the commencement of the fishing occurred at the same time as at Kinsale, the best weeks being also the same, but the results were somewhat handicapped by calm weather, which, on several occasions, prevented the boats from getting to sea. The average catches per boat per night during May were 16.6, 22.3, 22.9, and 16.2 boxes. At the end of June during one week 2,738 boxes were landed by 50 boats on one night, an average of 54.8, which is in excess of all previous records at any station. The fishing ended during the last week in June, the number of boats varying from 40 to 68.

At *Castletownbere* the commencement of the season differed from that of the previous year in respect of the number of boats engaged, 35 fishing out of this port at the end of April. The only good week was the last one of that month, when 5,187 boxes were landed on four nights, an average of 45.1 boxes per boat per night. After that the fishing declined until on 1st June there was only one boat at work. At the end of June some boats fished from here on their way home from the western ports, but without much success.

At *Valentia* a greater number of boats collected than was the case in 1903—64 being engaged at the end of May. The best week was, as at other stations, the last one of April, when 8,921 boxes were landed, an average of 34.8 boxes per boat per night. The weeks ending on 14th and 28th May, and 4th and 11th

June were also fairly satisfactory. Fish were taken until the 25th June in smaller quantities.

At *Fenit* during the last week of April 49 boats on four nights took 4,505 boxes, an average of 22.9 boxes. The best week was that of 14th May, when 10,740 boxes were landed by 60 boats on five nights, an average of 35.8 boxes. These figures do not compare favourably with those of 1903. The fishing practically ended on 11th June, only one boat being engaged after that date.

At *Arran Island* fish were not taken in quantities until the week of 14th May, when 2,507 boxes were landed by 29 boats fishing on four nights, an average of 21.6 boxes. The best week was that of 4th June, during which 2,990 boxes were taken. The number of boats working throughout the season was less than in 1903, and fishing was over in the middle of June.

#### *Autumn Mackerel Fishery.*

The autumn mackerel fishing in 1904 resulted in the largest catch for any one year since 1896. There were 64,754 barrels cured for exportation, that number being amongst the highest ever prepared in one season for the American market. The total amount landed—over 12,500 tons—was 3,110 tons greater than that of the previous season. The cash paid to the fishermen, however, was only £75,209, or £18,639 less than in the year 1903.

The decline in price may be ascribed chiefly to the fact that an unusual amount of small mackerel were cured at the beginning of the season. This established a low standard of price; and when, later on, the size of the fish improved, the American merchants had already provided themselves with stock, and the dulness of the demand made a recovery of price impossible before the autumn fishing terminated.

The greatest activity prevailed on the Dingle peninsula in Kerry, where over 15,000 barrels were prepared for exportation, £18,488 paid to the fishermen, and over £5,000 to coopers, packers, and other persons employed. In Smerwick Harbour,

in this district, 120,000 mackerel were landed on one morning by the canoes. The profits on the trade also return to the district in question, as the business is in the hands of purely local firms. All the fishing on this coast is by drift nets, and the boats used are chiefly canoes.

On Dursey Island, and on the neighbouring strip of coast as well as in all the creeks facing the Kenmare River as far east as Kilmakilloge, curing, while not as brisk as usual, did well. 12,650 barrels were prepared for exportation, and £11,558 was paid to the fishermen. Here the heaviest fishing is by means of seines. The large purse seines common on the American coast are gradually taking the place of the lighter seines that were in use for past generations.

From Kinsale, Glandore, Baltimore, and Schull the fishing is almost wholly in the hands of the large first and second class boats, which shoot their nets far out at sea.

At Kinsale 25,204 cwts. were landed, and 5,894 barrels cured for exportation, while the balance was sent fresh to the markets.

At Valentia the fishing and curing were about equal in amount to those at Kinsale, but the money earned by the fishermen was greater, the figures being—Valentia, £8,018; and Kinsale, £5,474.

Owing to low prices, which for a time prevailed at Kinsale, a strike against the buyers was threatened, but the following agreement was arrived at, and was published in the local papers:—

I. That the price of fish be inserted in the docket at the time of purchase. .

II. That all fishermen will henceforth be left at liberty to sell their fish to the highest bidder, except fishermen in boats owned by fish buyers, who are to sell to their owners provided they get the best price paid by their owners to any boat on the same day.

At Baltimore, Schull, Union Hall, and Cahirciveen, from 2,000 to 3,700 barrels were cured at each place.

Passing to the coast of Clare, we find a considerable falling off from the catch of the previous seasons, but at the Arran Islands there was a satisfactory improvement, 1,282 barrels having been cured for exportation.

Cleggan did not do as well as in 1903, and the same is true of the Mayo stations.

A feature of the fishing in 1904 was the opening of the trade at new stations on the coast of Waterford, and even in the Co. Down some curing went on for the American market.

On the Donegal coast the fishermen at this season are chiefly engaged in the capture of herrings.

For full details of the autumn mackerel fishery the tables in the Appendix No. 4, p. 14, must be examined; and in the chart between pages vi and vii the relative importance of this year's catch can be noted.

### *Summer Herring Fishery.*

The summer herring capture of 1904 proved nearly twice as great as that of 1903, but the cash value has only been £43,724, as against £30,437. The increase in quantity was fairly general. For example, the take at Dunmore East, on the south coast, rose from 12,088 cwts. in 1903 to 28,856 cwts. in 1904; and at Downing's Bay (Sheephaven) on the north coast, from 9,303 cwts. to 22,858 cwts. In both of these places the bulk of the fish was taken by Scotch boats; but in Donegal an increasing number of local crews are taking part in the industry, and during the past Spring sixteen local first or second class boats followed it. The Tory Islanders, too, in their open yawls, reaped a rich harvest. At this period of the year the greater number of Irish first-class boats are engaged in the mackerel fishery; while for the Scotchmen, who are fitted out for herring fishing only, the season on the Irish coast comes in opportunely at a time when they have no better employment in their own waters.

At Howth, where the Spring herring fishery begins later than in the districts already named, fifty-three Irish boats assembled, together with others from Cornwall and Scotland, and carried on a fishing which resulted in a total capture more than double that of 1903. Its value was over £4,000.

On the Donegal coast, at Cleggan, and in the Arran Islands (Co. Galway) almost all the catch was cured for export; but at other ports the great bulk of the herrings was sent fresh to market. At Burtonport all the herrings taken, viz., 1,070 cwts. were kippered.

Where curing is going on, the local girls are quickly learning the trade and rendering it less necessary for the curers to import female labour. So adept, indeed, have these girls become that Scotch merchants took a number of them to their stations in Scotland after last season on the Irish coast. The wages that the girls earn vary with the catch, but on some occasions, when heavy takes had been landed, girls made up to 10s. in the day.

The information gained by the telegraphic intelligence includes the following facts:—

At *Howth* the season commenced in the last week of May, and continued without intermission until the end of November, there being no interval between the summer and winter fishing. For statistical purposes the former is considered as ending on July 31st.

The total quantity of summer herrings landed was 3,519 mease, the good weeks being in the middle of July. The number of boats gradually increased through June and July, until eighty-two were engaged. The prices ranged from 10s. to 35s. a mease, and varied very sharply from day to day, according to the demand and supply. The quality of the fish was best in July.

At *Dunmore East* the fishing is carried on entirely by Scotch boats, which commenced to arrive at the end of April, and in May reached the number of thirty-five. The season closed in the first week of July. 11,492 mease were landed, the price varying from 2s. and 3s. a mease in April, when the fish were of poor quality and in large quantities, to 27s. 6d. in May. Here also the prices were irregular.

At *Helvick Head* 817 mease were taken in May and June, principally by the small fleet of a dozen local boats. Prices ranged from 10s. to 20s. The first week of July saw the end of the fishing.

At *Kinsale* the Scotch boats commenced fishing on the 7th of May, and in June thirty boats were engaged. 5,360 mease were landed, principally during the end of May and beginning of June. Price, from 8s. to 20s. a mease. The fishing was over on the 1st of July. The weather was very favourable.

*Burtonport* was the next station from which intelligence was received, there being no extensive summer herring fishing on the west coast, between Kinsale and that place. Fishing commenced on April 20th, and continued until May 21st, only a few boats being engaged. 303 crans were landed, and prices varied from 13s. to 24s.

At *Downing's Bay* the most successful fishing was carried on, the fish being of the finest quality. It commenced on May 4th, and ended on June 18th. Ninety boats were at one time engaged, and 6,391 crans were landed, varying in price from 10s. to 69s.

The fleet was composed of steam drifters and Scotch and local sailing boats; the fish were caught at considerable distances off the land. The by-law made by the Department prohibiting having nets on board herring boats before the 1st of May was found to be satisfactory, and has since been modified to embrace a larger portion of the north coast, and to avoid penalising boats which, through stress of weather, might arrive with nets on board prior to this date.

At *Buncrana* 2,729 crans were landed by a fleet of steam drifters and Scotch sailing boats, varying in numbers from twenty to sixty. The season lasted from 9th May to 28th May; prices were from 10s. to 50s., the average quality of the fish being high. Operations at this place are much handicapped by inadequate pier accommodation; the railway, on the other hand, being a material advantage.

At *Portavogie* a few mease of herring were landed in June by some twenty-five boats. The want of success at this place was locally attributed to the prevalence of easterly winds.

At *Ardglass* the season started by six boats fishing on 10th May. This number subsequently increased to forty, 8,344 mease being landed. Prices varied from 9s. 6d. to 20s., the quality of the herrings being best in the latter end of July. The fishing after 1st August is treated as winter fishing.

At *Kilkeel* the fishing was carried on during the same period as that at *Ardglass*, 2,158 mease being landed by from one to twenty-one boats. Prices, from 9s. to 25s. Weather on the whole was not favourable. Here also there was no interval between the summer and winter fishing.

Particulars will be found in Appendix No. 5, p. 20.

### *Autumn and Winter Herring Fishery.*

The Autumn and Winter Herring Fishery for 1904 resulted in a catch of 7,751 tons of Herrings, compared with 8,876 tons for the previous year.

The decline thus indicated was most pronounced at Downing's Bay, where 64 large Irish boats, 39 Scotch, and 11 Manx assembled for the fishing.

It was hoped that the decline and lateness of the fishing in 1903 had been temporary, but unfortunately there was an almost total failure in 1904, and the greater number of the boats went home without earning their expenses; whilst others, driven by a storm from their anchorage, were wrecked.

The curers also who had made full preparations, and had large stocks of barrels, and who had engaged staffs of workers, suffered much loss.

The few herrings that did appear for a short time at the end of the season fetched the usual high prices, and two or three local boats did well.

At the stations on the East Coast, while there was occasionally a good fishing for a week or two, the catch was less than in 1903.

The number of barrels cured was 17,045, showing an increase of about 6,000 on the cure of 1903. This was in consequence of the fact that although the general catch was smaller, there was a great increase in districts where the fresh herring trade is not so extensively prosecuted, and where the greater portion of the catch is cured. This increase was most remarkable in North-West Donegal, where 16,073 barrels were cured for export, compared with 8,356 in the previous year: and in this district the cash paid to the fishermen for herrings exceeded £17,500.

Late in the year there was a brisk herring fishing for a short time in the Kenmare River, and the fishings in Donegal Bay and in Galway Bay were a little better than in 1903.

The information gained by the telegraphic intelligence includes the following facts:—

At *Houth* the total quantity of herring landed between 1st August and the middle of November was 4,015 mease. In the middle of August the number of boats employed reached 67, and prices ranged from 30s. at the height of the fishing in August and

September, to 8s. in November. The quality early in the season was very good, but the weather was not generally favourable, the number of nights on which fishing could be carried on being only 53.

At *Arklow* the season was from 10th October to 14th January, 1905, 1,586 mease being the total. The number of boats varied from 46 to 6, and the price from 11s. to 33s. In the early part of the season the operations were much interfered with by the bad state of the bar at the harbour mouth.

At *Dunmore East* the fishing was practically a failure.

In *Donegal Bay* some 40 small boats caught immense quantities of herrings in November, about 68 tons being landed in three weeks.

At *Rosbeg* a fleet of almost 200 boats was at times employed between the end of October and Christmas. There were great quantities of herring in the bay, but the weather being very stormy, the boats were hardly ever able to fish on two consecutive nights.

At *Burtonport* a few herrings were taken in September, October and November, but in December most of the total of 8,025 crans were landed. At times 200 boats were engaged, and prices were from 11s. to 30s.

At *Kincasslagh* 2,250 crans were taken in November and December by some fifty boats. Prices from 13s. to 34s.

At *Downing's Bay* 906 crans were landed, principally in the end of September, the quality being very good and the prices from 25s. to 40s. As many as 100 boats were at one time employed, but owing to the rapid decline of the fishing they began to abandon it at the end of November.

At *Buncrana* and *Portavogie* a few herrings were landed in October.

At *Ardglass* the fishing yielded 4,021 mease between 1st August and 10th October. Seventy-two boats were at one time engaged. Prices from 9s. 6d. to 25s. The best fishing was during the latter half of August.

At *Kilkeel* 2,913 mease were landed. Prices from 9s. to 27s. The number of boats varied from 10 to 32. Fish were plentiful in August and October, but not in the beginning of September. The fishing was practically over at the end of October.

Particulars will be found in Appendix No. 6, p. 26.

### *Loans.*

There were received during the year 152 applications from 188 persons, for loans amounting to £2,431 16s. 6d. Of these there were recommended 148 loans to 184 persons, to the amount of £2,329 4s. 6d. The sum actually issued during the year was £2,123 3s. 7d.

Since the passing of the Purchase of Land and Congested Districts (Ireland) Act, 1891, under which a sum of £20,000 was reserved for administration in non-congested districts (which fund has been placed at the disposal of the Department by the Act 62 and 63 Vic., cap. 50), the sum of £34,120 12s. 9d. was advanced by way of loan up to the 31st December, 1904. The promissory notes signed to secure principal and interest amounted to £36,746 11s. 3d. The repayments were £29,109 16s. 7d.\*; the outstanding notes not arrived at maturity £6,837 3s. 1d., of which, however, £99 16s. 8d. is known to be irrecoverable. The arrears on the £36,746 11s. 3d. amounted to £801 4s. 10d., of which £253 0s. 2d. are irrecoverable. It will be thus seen that the *bad debts* do not amount to 1 per cent.

On 31st December, 1904, the Fund stood thus:—

	£	s.	d.
Government Stock,	20,000	0	0
Cash,	2,188	16	6
Outstanding Promissory Notes not arrived at maturity (less £99 16s. 8d. known to be irrecoverable),	6,737	6	5
Arrears (excluding £253 0s. 2d. irrecoverable),	548	4	8

The work of actually issuing these loans and collecting the repayments, has been carried on by this branch of the Department since 1st April, 1904.

Further particulars in connection with these loan transactions will be found in Appendix No. 16, p. 52.

### Casualties.

The number of fishermen who lost their lives in the year ended 30th September, 1904, while actually in pursuit of their calling, was nine, as compared with sixteen in the previous year. One was drowned while engaged in work not immediately connected with fishing. There were three casualties of that nature in the year ended 30th September, 1903.

Two first, eight second, and five third-class boats were lost this year while engaged in fishing, as compared with four first, fourteen second, and nineteen third class, respectively, in the previous year.

The following are the particulars of the casualties, as furnished by the Coast Guard Officers at the various Stations:—

From Howth Station.—The owner of a fishing boat was drowned off Howth on the 5th September, 1904, whilst out sailing.

From Ringsend Station.—On the 24th July, 1904, a steam trawler foundered off Lambay Island. Her crew was rescued.

\* See Note (a) in Appendix No. 16, p. 55.

From Arklow Station.—A second-class boat was totally destroyed by fire in Arklow Harbour on 1st September, 1904.

From Upper Cove Station.—On 22nd October, 1903, a first-class boat was sunk off Old Head, through collision.

From Ring Bar Station.—At South Ring a third-class boat was damaged beyond repair by a gale in September, 1904.

From Union Hall Station.—A second-class boat, whilst trawling in Big Sound on 28th November, 1903, was struck by a squall, and sunk. Three of the occupants were drowned.

From Ballyerovane Station.—During a heavy storm on the 11th October, 1903, a third-class boat was blown from Clenderry Harbour, and was lost.

From Ballydonegan Station.—On 15th September, 1904, a second-class boat was driven ashore, and was totally destroyed.

From Lackeen Point Station.—On 15th August, 1904, a fisherman fell overboard from a first-class vessel in Kilmakilloge Harbour, and was drowned.

From Knightstown Station.—Two third-class boats, with their nets, were washed from Trawaginnau Slip on the 8th December, 1903, and were totally destroyed.

From Dingle Station.—Whilst lying at anchor in Brandon Bay on 11th February, 1904, a second-class boat was sunk by a gale.

From South Arran Station.—During a gale on 13th February, 1904, a second-class boat sank at her moorings at South Arran Strand, and could not be recovered.

From Tully Station.—Early in March, 1904, owing to a strong gale from the south-west, and an exceptionally high tide, a third-class boat was swept from the strand, and was lost.

From Mulroy Station.—A second-class boat was wrecked at Brugh Head in November, 1903. A fisherman was drowned south of Tory Island on 14th May, 1904.

From Bangor Station.—On 1st September, 1904, a second-class boat struck submerged wreckage north of Copeland Island, and was lost.

From Portaferry Station.—On 17th September, 1904, a fisherman belonging to Kircubbin fell overboard, and was drowned.

From Ardglass Station.—Two fishermen were drowned. One of them fell from the pier at Ardglass on 14th August, 1904, and the other fell overboard from a fishing vessel.

From Clogher Head Station.—On 13th January, 1904, a second-class vessel capsized, and was lost. One of her crew was drowned.

*Piers and Harbours.*

In the Report of the Inspectors of Irish Fisheries for the year 1894 a return was given relating to works under the Sea Fisheries (Ireland) Act, 1883 (46 and 47 Vic., c. 26), up to the 31st March, 1895.

Since that time particulars of the yearly expenditure under the Act have been given in the Annual Reports of the Fishery Authorities.

The expenditure during the year ended 31st March, 1905, was as follows :—

Pier Works:	£	s.	d.
Ardmore Pier and Breakwater,	1,382	16	0
Engineering Staff Expenses,	362	19	1
	£1,745	15	1

The operations of the Department during 1904 in connection with the construction and improvement of fishery piers were as follows :—

*Arklow.*—Owing to the inability of the Harbour Board to incur the expenditure necessary to keep open the passage through the bar, the Department erected a steam crane and grab on the pierhead, and subsidised a small local dredger. These operations have had the effect of mitigating the evil. The Department have further undertaken to procure and work a sand pump dredger specially designed to suit the local conditions. This vessel is now being built.

*Courtown.*—A scheme involving repairs and dredging to this harbour is being carried out at the joint expense of the County Council and the Department, the Harbour Board having transferred their rights to the former body.

*Poulduff.*—Plans for the extension of this pier have been made, and tenders invited for its construction. Its total cost will be some £2,200, of which the County Council are to contribute £1,000 and the Department the balance.

*Kilmore.*—The Department offered £500 towards the total expenditure (estimated by the County Council at £1,000) for the improvement of the harbour and extension of the breakwater.

*Slade.*—The construction of an inner breakwater has been completed at the joint expense of the Department and County Council. It has given the greatest satisfaction to the fishermen, their boats being now able to live in this harbour in any state of the weather.

*Passage East.*—A scheme has been formulated by which the Board of Works are to contribute £2,000, and the Department and County Council £2,200 each, towards improvements. The constructional details are still under consideration.

*Tramore.*—The Department have undertaken to carry out the reconstruction of this pier at a cost of £5,000, the expenditure being shared by the Department and County Council.

*Ardmore.*—A sum of £400, part of the Department's contribution of £1,000, was paid over to the Board of Works, by whom this pier has now been nearly completed.

*Cow Cove.*—The Department made an offer to the County Council to bear one-half the cost of the erection of a pier at this place. The total cost was estimated at £1,624.

*Blind Harbour.*—The Department informed the County Council that they were prepared to provide one-half the funds for a pier estimated to cost £820. In this and the preceding case legal difficulties have delayed the negotiations.

*Adrigole.*—The Department have allocated £1,000 towards the construction of a pier in connection with the steamboat service which is now in course of organisation by the Department, Congested Districts Board, and the County Council.

*Foynes.*—Repairs to cost £900 are being carried out by the Department at this pier.

*Liscannor.*—£950 has been paid over to the Board of Works, being part of the Department's contribution to the improvement of this harbour under the Marine Works Act of 1902.

*Kinvarra.*—Negotiations are in progress for the repair and extension of the quays at this place by the Board of Works in collaboration with the County Council, Congested Districts Board, and Department at a cost of £3,300.

*Lough Corrib.*—The Department and the Congested Districts Board are undertaking the erection of several small piers on the shores of this lake in connection with the steamboat service.

*Portaferry.*—The Department offered to the County Council a contribution (not exceeding £700), of one-third the cost of a new landing-slip at this place.

*Salterstown.*—The Department offered to erect a boat slip and to contribute one-half the estimated cost of £300, if the balance were locally forthcoming.

Numerous inspections have been made by the Department of the sites of other proposed piers, and in some cases surveys are being undertaken so as to arrive at estimates of the cost of construction. The carrying out of the Department's general policy in the matter of piers has been somewhat hampered by legal difficulties which arose from the limit placed by the Local Government (Ireland) Act, 1898 on the amount of the contributions which can be made by County Councils to new works.

*Marine Superintendence.*

Between the month of June, 1904, and the date of this Report the cruisers at the disposal of the Department captured seven steam and one sailing vessels working in areas closed to trawling. The coastguard assisted in one of these cases, and the coastguard and local fishermen were instrumental in securing a conviction in an eighth case. The magistrates imposed fines in six cases of £20, in one of £50, in one of £10, and in one of £5. Costs were awarded in all. Three persons were discovered by the coastguard illegally trawling in Belfast Lough, and were fined 20s., 5s., and 5s. (and costs), respectively.

One of the steam trawlers referred to in the first paragraph above was registered in a foreign country, and it was found impossible to enforce the order made by the magistrates against owner and skipper.

It has frequently happened that British steam trawlers are deliberately registered in foreign ports with the object of enabling them to avoid the regulations to which British sea-going vessels are subject. It is thought, however, that means have been found within the existing law of compelling foreign trawlers to observe the by-laws affecting Irish territorial waters.

The s.s. *Helga* seized three herring nets that were found set off the Donegal coast during prohibited hours. The nets were sold and realised £6 10s. 0d.

*Instructors and Bailiffs.*

During the year under review the Department again employed a bailiff to supervise the public oyster fishery in Tralee Bay, and to see that the regulations were carried out. His efforts during the last three seasons have had a most beneficial effect. This bailiff also visited, at intervals, the mussel fishery in Castlemaine Harbour with a view to assisting the police in checking the taking of undersized mussels.

An instructor was provided for a boat belonging to Port Ballintrae, County Antrim, the crew of which desired to try the spring mackerel fishing. A train of mackerel nets was procured by loan, and the boat fished during the season from Cleggan, County Galway, but unfortunately they were not lucky in finding fish.

The same crew were also provided with an instructor for the winter herring fishing at Downing's Bay.

A skilled fish-curer was sent to Ardmore, County Waterford, to instruct the fishermen in curing mackerel for the American market. His services were much appreciated.

A small subsidy was granted to a firm in Cork dealing in fishing gear, who had erected two hand looms for net-making, and who found a difficulty in getting a trained man to work them and instruct their employes. This venture seems to be meeting with a fair measure of success, the firm in question possessing already, in the capacity of agent, a constant market for such goods.

## INLAND FISHERIES.

*Salmon Fisheries.*

The main features of the salmon fisheries in 1904 were satisfactory captures of spring salmon and unsatisfactory of peal. These latter form the larger portion of the total catch; and the result is indicated by the falling off of 500 tons in the amount of fish which, according to the returns furnished to us, was carried over Irish railways in 1904, as compared with that in the previous year. In the case of one district the decline in the take of peal is attributable to the circumstance that the run took place after the end of the netting season.

Eleven of the fishery districts report an improvement, three no change, and ten a decline in the amount captured, as compared with 1903. The rivers on the East Coast seem to have been generally satisfactory, the decline being most marked on the South-West and West Coasts.

The development of the drift-net fishing for salmon off the North-West Coast during the last few years, has been most marked. The number of drift-nets licensed off the West Coast of the County Donegal increased from 46 in 1903 to 122. In the Londonderry District the number increased from 108 to 121. As an instance of the possibilities of this industry, one boat fishing off Sheephaven got £160 worth of fish, or over 600 fish, during the season of five weeks. On one night this boat took 193 fish in a single shot of the nets. In the neighbourhood of Malin Head from 50 to 240 salmon and peal were taken by each boat during the season, which began about 15th June and lasted till the 20th July. Boats frequently worked ten miles from the mainland, and in one case are reported to have caught fish as far off as eighteen miles. A further large extension of this industry may be expected, it being the intention of the fishermen to exploit the waters to the south of the areas hitherto fished in this way.

The reports on angling received from the various districts are very diverse in character. This is mainly attributable to the decreased number of peal, and also to the lowness of the water in the middle of summer. The southern rivers and those of the Dublin district were particularly disappointing. On the other hand, very good reports were received from the Killarney, Ballinakill, Colernine, and Ballycastle Districts.

Offences against the fishery laws have diminished in fifteen districts, in three have remained about the same as last year, and in six others are reported to have increased. In some of the latter this increase may only be apparent, and rather be due to more detections, owing to better supervision. The great diffi-

culty of adequately controlling the drift-net fishery carried on at considerable distances from land also tends to increase these offences. In view, however, of the greater number of nets at work, the general position is not unsatisfactory.

Cases of malicious poisoning occurred in the Lismore, Kenmare, and Coleraine districts. There were only three of them—the fewest for many years past. As usual prosecutions had to be undertaken for flax water pollution in those districts in which flax is grown, as well as for river pollution by the effluent from factories—the latter generally in the Coleraine district. In the Ballyshannon district one case of poisoning through the use of an agricultural spraying machine was reported.

The Inspector-General of the Royal Irish Constabulary has instituted a Fishery Reward Fund in connection with detection of fishery offences by members of the Force. This fund will primarily consist of the one-third part of the penalties which, by statute, is payable to the members of the Force who have been the means of bringing offenders to justice (and which has been hitherto paid to the individual policeman) but most of the Boards of Conservators have consented to add the two-thirds of the penalties to which they are entitled. Out of the fund so constituted the Inspector-General will allocate rewards to his men in proportion to the work done by them individually in fishery protection. Efficiency in such work is also to be taken into account in questions of promotion.

An Inquiry was held by the Department into the advisability of defining the mouth of the River Dromoghty, in County Kerry. The definition suggested by the Department did not, however, meet with the approval of the Lord Lieutenant in Council. A general inquiry into the state of the salmon fisheries of the River Cashen, in County Kerry, resulted in the constitution of a local Committee (under the control of the Board of Conservators of the Limerick District) for the preservation of this river and its tributaries; and a local fund in aid of this has been started, to which the Department have contributed.

At the request of the Connemara Board of Conservators inquiries were held into the advisability of controlling the setting of trammel nets in the creeks and estuaries of the rivers in their district. By-laws have been passed prohibiting the use of such nets in the inner portions of these creeks, and permitting their use in the outer areas, where they seem unlikely to interfere with the salmon fisheries. The By-laws are now in force.

Contributions in aid of protection were made by the Department to the Conservators of the Coleraine district in regard to Lough Neagh; to the Killarney, Dublin, Waterford, and Waterville Conservators, and also to the Corrib Fisheries Association, the Lough Arrow Fish Preservation Association, and the Westmeath Lakes Association—the latter being principally for the preservation of trout. Some of these grants were made on condition that

local voluntary contributions should be forthcoming towards the objects in view, and all were conditional on the work being carried out to the satisfaction of the Department.

The output of salmon and trout fry from hatcheries was 5,482,580, as against 4,800,000 in 1903.

Full details of the hatchery operations will be published in Part II. of this Report.

The total number of rod licences issued was 3,113, compared with 2,931 in 1903. In regard to engines used in the tidal waters by fishermen who fish on common law rights, the number of draft net licences issued was 709, an increase of 10 on the previous year; and drift nets, 482, an increase of 110.

The total amount received by Boards of Conservators for licences in 1904 was £10,260. The total ten per cent. rate collected on the poor-law valuations of fisheries was £399 18s. 10d. Fines, and the sale of forfeited engines, &c., produced £701 3s. 9d., and subscriptions came to £1,340 9s. 9d. The grand total was £13,201 12s. 4d., in 1903 it was £13,394 4s. 11d.

See Appendices No. 24, p. 126, and No. 27, p. 146.

### *Eel Fisheries.*

The Department have caused inquiries to be made into the value of the eel fisheries, which form an important fresh water industry, the results lead to the conclusion that the quantity of eels taken in Ireland in 1904 was not less than 17,500 cwt., representing a money value in the country of £35,000.

The large weirs on the Shannon, Bann, Moy and Corrib captured the majority of the fish, which were nearly all consigned to English markets in the Midlands and to Billingsgate. These fish are taken at night during the autumn and winter, when on their way to the sea for the purposes of reproduction. The engines employed are weirs with nets fixed in the openings, coghills and other similar devices, and in some of the lakes also long-lines or spillers.

### *Pollen Fisheries.*

The amount of pollen captured in Lough Neagh during 1904 was about the same as in the previous year. Over 95 per cent. of the take is exported. There were 371½ tons so dealt with, as against 372½ in 1903. At an average price of £16 a ton, the value of the export would be £5,944.

Licenses were issued in 1904 for 98 trammel and 164 draft nets for pollen, producing £344. It requires two men to work one of these engines.

## SCIENTIFIC RESEARCH.

Since the issue of Part I. of our Report for the year 1903, Part II. for the years 1902-3 (combined) has been completed by Mr. Holt, the Scientific Adviser to the Branch, and has been published.

Many scientific and other reports have been received during the year; and this opportunity is taken of thanking those who placed at the disposal of the Department the valuable information they contain.

## LOUISIANA PURCHASE EXPOSITION.

The Irish exhibit at the St. Louis Exposition, organised by the Department, included a fisheries section which was arranged by this Branch. As it was found impossible for any official belonging to the Branch to go to St. Louis, it was necessary to settle all the details of the arrangement and labelling of this sectional exhibit prior to its despatch,—a work of great complexity. A handbook was published, giving a short account of the different classes of fishing pursued in Ireland, and of the powers and duties of the Department as the Irish Fishery Authority.

Large diagrams illustrating the position of the principal fishing ports, fishing grounds, and salmon rivers, models of the principal types of fishing boats, a canvas canoe from County Kerry, and an extensive series of photographs of fishing operations, were included in the exhibit, as well as an illustration of the Department's system of fishery intelligence, photographs of the brands used on their barrels by the principal Irish exporters of mackerel and herrings, and types of mackerel and herring nets. The Department have reason to believe that the exhibit of the photographs of brands has had the effect of bringing American buyers into direct touch with Irish curers.

The steam-trawling industry was illustrated by a perfect model of a trawler of the most modern type, which was kindly lent for exhibition by the Fishmongers' Society of London. The exhibit also contained specimens of the devices used in the capture of lobsters and crabs, and in the cultivation of oysters.

In connection with the salmon fisheries the handbook contained general information as to the intricate code of laws governing this industry, and an account of the principal methods of capture. A collection of the artificial flies used in the various districts, cases of rods and tackle made by different manufacturers, a case illustrating the Department's salmon-marking operations, and specimens of the apparatus used in the hatcheries controlled by the Department, were also exhibited. Models of the largest and most modern hatchery in Ireland (that at Lismore), showing (*a*) the general arrangement, (*b*) a section of the hatching house

with the position of the hatching troughs, etc., proved of considerable interest in a country where so much attention is devoted to artificial propagation.

In organising this exhibit, the Branch are under obligations particularly to the Congested Districts Board and the Fishmongers' Company of London, as well as to several manufacturers of tackle, etc., for their kind co-operation in supplying articles of interest.

We have the honour to be,

Sir,

Your obedient servants,

WM. SPOTSWOOD GREEN,

*Chief Inspector of Fisheries.*

ABSTRACT of BY-LAWS, ORDERS, &c., in force at date of this Report relating to the SALMON FISHERIES of IRELAND.

Place affected by By-Law, and Date thereof.	Nature of By-Law.
<b>SALMON AND TROUT.</b>	
<b>Dublin District.</b>	
River Liffey, (19th Jan., 1865.)	Prohibiting the catching, or attempting to catch, Salmon with any Net of greater length than 350 yards, in that part of the River Liffey which is situated between the Weir known as the Island Bridge Weir and a line drawn due North from Poolbeg Lighthouse.
Between Dalkey Island and Wicklow Head. (15th Oct., 1874.)	Permitting use of Nets with Meshes of one inch from knot to knot for capture of Salmon or Trout between Dalkey Island and Wicklow Head.
Broad Meadow Water and Swords River. (28th Aug., 1884.)	Prohibiting to have in possession for the purpose of taking fish, or with intent to take fish, at any season of the year, on or near the banks of the Broad Meadow Water and Ward or Swords River, any Spear, Lyster, Strokehaul, or Gaff (except a Gaff for the purpose of being used solely as auxiliary to angling for Salmon legally with Rod and Line).
Whole District, (28th Aug., 1893.)	Prohibiting to beat the water, or to throw stones or other missiles therein, for the purpose of driving Fish close in to the Banks of any River within the District.
<b>Wexford District.</b>	
River Slaney, (12th Aug., 1881.)	Prohibiting the practice of keeping Nets on board Boats between Sunset and Sunrise, during the Annual Close Season for Salmon and Trout, in that part of the River Slaney situated between Ferryarrig Bridge and the Town of Enniscorthy.
River Slaney, (12th Oct., 1882.)	Repealing By-Law dated 4th March, 1862, which prohibited the use of nets with meshes of less size than one-and-three-quarter inches from knot to knot, during the open season, in that part of the River Slaney between Ferryarrig Bridge and Enniscorthy.
River Slaney, (28th Dec., 1893.)	Repealing so much of the By-Law dated 12th October, 1882, as permitted the use of Nets with meshes of one-and-a-quarter inches from knot to knot, in the Tidal Waters of the said River Slaney, and in lieu thereof permitting the use of Nets with meshes of one-and-a-half inches from knot to knot (or Six inches to be measured all round each such mesh, such measurements being taken in the clear when the Net is wet), for the capture of Salmon or Trout in the Tidal Waters of the said River Slaney, and its Tributaries, during the Open Season for the capture of Salmon and Trout.
River Slaney, (29th March, 1900.)	Prohibiting to use any Net at or near that part of the Mouth of the River Slaney comprised within the space bounded by imaginary lines drawn from the Coast Guard Watch House on the Townland of Rosslarefort to Bullock Bank; from Bullock Bank to Raven Point; from Raven Point to Molly's Buoy; from Molly's Buoy to Maguire's Buoy; thence to Cull Buoy; and thence to the Wharf on the aforesaid Townland of Rosslarefort.
River Slaney and Tributaries, (30th April, 1894.)	Prohibiting the use of any Net for the capture of Salmon and Trout, save a Net duly licensed in that behalf, in that part of the River Slaney, situate between Wexford Bridge and Ferryarrig Bridge, and the Tributaries falling into that portion of the said River Slaney.
River Slaney and Tributaries, from Enniscorthy Bridge to Sources. (13th Dec., 1898.)	Prohibiting to beat the water or throw stones or other missiles in that portion of the River Slaney and its tributaries extending from Enniscorthy Bridge to the sources of the River Slaney and its tributaries, for the purpose of driving fish close in to the banks of the said River and said tributaries.

## APPENDIX

## SUBSTANCE of REPORTS received from Clerks of

DISTRICT.	What is the general state of the Salmon Fisheries in this District? Are they as a rule improving or declining?	Has the take of Salmon and Grilse by nets and weirs throughout the District been more, or less productive in the present year than in the past one?
Dublin, . . . . .	Fair; about the same as last year.	More spring fish taken but much less grilse.
Wexford, . . . . .	Improving. . . . .	More salmon; less grilse.
Waterford, . . . . .	Fairly satisfactory; improving.	Salmon less productive; grilse less also, as run had not occurred before end of netting season.
Lismore, . . . . .	Good; improving.	The take of salmon was very good; the take of grilse poor.
Cork, . . . . .	Fairly good; slight improvement.	Less productive.
Cork (Bandon), . . . . .	Fair, showing tendency to improve.	About the same.
Skibbereen, . . . . .	Very poor; great falling off from last season.	Less productive.
Bantry, . . . . .	Bad; declining. . . . .	Less productive.
Kenmare, . . . . .	Very bad; declining. . . . .	Less productive.
Waterville, . . . . .	Fairly good; improving.	Net fishing less productive owing to inclement weather; weir fishing greatly improved.
